and
Association of American Physicians

April 24 - 26, 2009
The Fairmont Chicago
Chicago, Illinois

Meeting Program
Welcome to Chicago!

Special Events

ASC1 Welcome Reception and ASC1 Annual Dinner
Friday, April 24
6 – 9 p.m.

On Friday, April 24, at 6 p.m., the ASCI Welcome Reception brings together attendees of the ASCI/AAP 2009 Joint Meeting. This event will take place in the Imperial Ballroom foyer, and all attendees of the ASCI/AAP Joint Meeting are invited to attend. The ASCI Annual Dinner follows at 7 p.m. in the Moulin Rouge room. Tickets are $60, supply is limited. The dinner will feature a talk titled, “Translational Research: Converting the Valley of Death into the Garden of Eden” by Barry S. Coller, MD, The Rockefeller University, and Robert M. Califf, MD, Duke Clinical Research Institute.

AAP Reception and Dinner
Saturday, April 25
7 – 10 p.m.

On Saturday, April 25, the AAP Annual Reception and Dinner will be held in the Imperial Ballroom. The reception will begin at 7 p.m. in the Imperial Ballroom Foyer, followed by dinner at 8 p.m. Paul Farmer, MD, PhD, Harvard Medical School, Brigham and Women’s Hospital, will present, “Poverty and Sustainable Healthcare.” This dinner is open to AAP membership and their guests only.
General Information

Meeting Objectives
The Joint Meeting Planning Committee strives to represent the cutting edge of biomedical research and medicine. The Committee is especially interested in identifying gaps in knowledge that may exist in the target audience, which consists of physician-scientists, research scientists, clinicians and medical education professionals. The meeting also targets junior scientists and trainees, who benefit from close interaction with senior colleagues.

The Joint Meeting conducts post-meeting surveys of attendees to ensure that the objectives of the meeting have been reached and that quality standards have been met. For the 2006 through 2008 Joint Meetings, attendees reported that the overall meeting was above average to exceptional (a score of 1.72, on a scale of 1 through 5, 1 being exceptional), they reported a high degree of satisfaction in achieving the meeting's learning objectives (a score of 1.73), and had above average to exceptional practical application to their research and practice (a score of 1.9). Additionally, survey results indicated a broad appeal to diverse disciplines. For the last three years, survey respondents have identified their areas of work as basic research (~13% of respondents on average), endocrinology/metabolism (~10%), immunology (~9%), nephrology (~7%), infectious diseases (~7%), and cancer biology (~6%), with representation beyond this inclusive of cardiology, neurology, rheumatology, pulmonology, gastroenterology, and others.

Given that the Joint Meeting Planning Committee has worked to produce a meeting of broad applicability, these survey results indicate that the Joint Meeting format meets this goal and serves a crucial need in the community of researchers and physicians to which the meeting is targeted. Based on the objectives and program described in this proposal, the Planning Committee believes that this year's Joint Meeting will continue this tradition of excellence. Stem cell biology and the role of innate immunity are the topics for the 2009 Joint Meeting, with presentation of the following planned:

- The investigation of stem cell biology
- The potential use of stem cells in the treatment of human disease, with discussion of tissue-specific stem cells
- The role of the innate immune system in response to pathogenic and non-pathogenic disease
- The role of innate immunity in the induction of acquired immunity

The program will feature lectures by leaders in their respective fields who will discuss state-of-the-art advances that are evidence-based and relevant to the objectives of the meeting. The program is designed to foster in-depth discussions and close interactions among the meeting participants, including various break-out sessions especially for the benefit of junior investigators and trainees. At the completion of this meeting, participants will be able to: (1) describe important recent advances in stem-cell biology and innate immunity, and (2) describe the roles that improved understanding of stem-cell biology and innate immunity can play in the potential treatment of human disease.

The Joint Meeting stands in contrast to subspecialty meetings by providing unprecedented opportunities for professional and scientific interactions among investigators and clinicians from diverse areas. The meeting truly represents the crossroads of multidisciplinary biomedical research.

Overall Meeting Evaluation
The ASCI/AAP Joint Meeting Planning Committee needs your input to enhance future meetings. An online meeting evaluation survey will be e-mailed to you shortly after the Joint Meeting. Your participation in this survey is greatly appreciated.

CME Information
The Federation of American Societies for Experimental Biology (FASEB) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians. This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (CME) through the joint sponsorship of the FASEB and the ASCI and AAP.

FASEB designates this educational activity for a maximum of 8.5 AMA PRA Category 1 Credit(s). Physicians should claim only credit commensurate with the extent of their participation in the activity. CME applications will be available at the registration desk. You must submit your application for CME credits online at: www.faseb.org/meetings/cmeactivities.htm. After entering the site, you will need to input your Joint Meeting Member ID in order to complete the online application. You can find this number on your Joint Meeting confirmation and receipt. There is a $45 processing fee payable by credit card.

Questions regarding your continuing education credits should be directed to:

FASEB CME
Office of Scientific Meetings and Conferences
9650 Rockville Pike, Bethesda, MD 20814-3998 USA

E-mail: fasebcme@faseb.org

Poster Session Schedule
Friday, April 24  Set-up  4 p.m. – 7 p.m.
Friday, April 24  Viewing  7 p.m. – 9:30 p.m.
Saturday, April 25  Viewing  7 a.m. – 11:30 a.m.
Saturday, April 25  Presentation  11:50 a.m. – 1:30 p.m.
Saturday, April 25  Dismantle  1:30 p.m. – 2:30 p.m.

Presenters must attend the 11:50 a.m. – 1:30 p.m. session on April 25. Presenters are not required to be present during viewing hours.

Best Poster Awards
Best Poster Awards will be given in the amount of $1,000 each. Members of the ASCI and the AAP will judge posters on scientific novelty, quality and clarity of presentation. Awards will be presented Sunday at 9 a.m.

ASCI Membership Desk
Visit the ASCI membership desk in the foyer of the International Ballroom for a list of new members, to pick up complimentary recent issue of The Journal of Clinical Investigation, and for general inquiries about membership.

AAP Membership Desk
Visit the AAP membership desk in the foyer of the International Ballroom. The AAP staff will be there to greet you and answer membership questions.

Registration Hours
Friday, April 24  1:00 p.m. – 7:00 p.m.
Saturday, April 25  7:00 a.m. – 5:00 p.m.
Sunday, April 26  7:00 a.m. – 10:00 a.m.

**Faculty Disclosure**

The Federation of American Societies for Experimental Biology (FASEB) requires that audiences at FASEB-sponsored educational programs be informed of a presenter’s (speaker, faculty, author or contributor) academic and professional affiliation, and the existence of any significant financial interest or other relationship a presenter has with the manufacturer(s) of any commercial product(s) discussed in an educational presentation. When an unlabeled use of a commercial product or an investigational use not yet approved for any purpose is discussed during the presentation, it is required that presenters disclose that the product is not labeled for the use under discussion or that the product is still investigational. This policy allows the listener/attendee to be fully knowledgeable in evaluating the information being presented.

Disclosure includes any relationship that may bias one’s presentation or which, if known, could give the perception of bias. These situations may include, but are not limited to:
1. Stock options or bond holdings in a for-profit corporation or self-directed pension plan
2. Research grants
3. Employment (full- or part-time)
4. Ownership or partnership
5. Consulting fees or other remuneration
6. Non-remunerative positions of influence such as officer, board member, trustee or public spokesperson
7. Receipt of royalties
8. Speakers bureau
9. Other

For full-time employees of industry or government, the affiliation listed in this program will constitute full disclosure.

The following presenters have indicated a relationship that, in the context of their presentation, could be perceived by some as a real or apparent conflict of interest but do not consider that it will influence their presentation. The number following each company name represents the specific relationship from the list above. Disclosure information is printed exactly as submitted by the presenter. If a presenter is not listed, then he/she had no relationship to disclose. Disclosures from program committee members are also included.
